V-Air® SOLID Sub-Micron Passive Fragrance Dispenser

The V-Air® SOLID MVP dispenser utilises pioneering multi-phasing, sub-micron air freshener technology through a discreet dispenser and solid fragrance cartridge, providing consistent fragrance to indoor spaces for up to 60 days.

The V-Air® SOLID particles enable superior fragrance delivery, yet are sized typically below 1.0 micron. This means they are much smaller and lighter than the particles in other fragrance systems, remaining airborne for many hours. This makes V-Air® SOLID highly effective whilst being safe for public areas and continuous exposure.
